OUR KINDERGARTEN

- ❖ Our kindergarten is located in the center of Újpest, with good transportation, yet in a green environment, surrounded by houses. There is also a nursery, a school, a playground, and multiple shopping opportunities in our area.

- ❖ The building and the playground of the kindergarten went through a **complete renovation** in 2019-20, so we are welcoming the children in an aesthetic, modern, well-equipped, and safe environment..

- ❖ Our homelike, cozy classrooms are **richly equipped** with a variety of toys. The equipment also encourages children to engage in diverse activities and games: there is a storytelling-corner, another corner for dolls and for roleplaying, construction toys, boardgames, costumes, motoric games, and a creativity corner (with art tools, drawing and crafting materials, paint, and playdough, specially selected for their ages). Each of our 8 groups has its own dressing room and bathroom.

- ❖ We have a multifunctional room with a **salt wall**, and a gym with multiple tools for developing motoric skills, which also has wall bars.

- ❖ In our development room, **a speech therapist, a psychologist, and a special education teacher** can work with the children, when necessary.

- ❖ **A refreshing water area for the summer, a trampoline, a road for vehicles with traffic lights, a Kneipp walking path, 3 fields covered with fake grass and rubber for motoric activities, many swings, monkey bars, and sandpits** make it more enjoyable for our children to enjoy their time outside in the playground. **Fruit bushes and trees, a vegetable and a flower garden, bird-feeders, an insect-hotel, and a wind wheel** bring nature closer to our kindergarteners.

OUR PEDAGOGICAL PROGRAM

- ❖ **Our teachers** are qualified higher education graduates. All our colleagues are **child-loving, empathetic personalities** who work with passion.

- ❖ During the everyday life in the kindergarten, we strive for making the kids develop socially, emotionally, and intellectually, for unfolding their individual abilities, and for letting them live their childhood happily. We also develop our daily schedule children-oriented, being aware that the most important and most developing activity of a young child is free play.

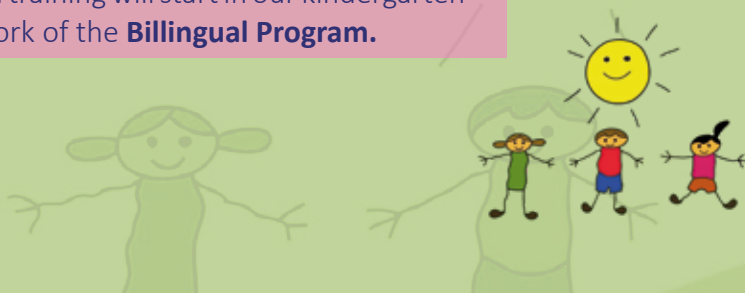

- ❖ Exercise and the development of healthy lifestyle habits play a key role in our kindergarten. We create a variety of options to meet the movement needs of children. (Daily exercises, gym sessions, playground time, trips, gardening, swimming, ice-skating, ...)

- ❖ In our developmental and talent-keeping sessions, our teachers develop logical thinking, movement, and musical skills.

- ❖ In the afternoon special sessions, children can take part in **English, folk dance, gymnastics, hip-hop, drama, foundation therapy, football, and “school tasting” sessions.**

- ❖ As from the school year of 2020/2021, the English-Hungarian bilingual training will start in our kindergarten within the framework of the **Bilingual Program.**

GALLERY

THEY DON'T FEEL LIKE THEY'RE STUDYING, BUT THEY STILL KNOW IT IN BOTH LANGUAGES

- English as a **natural** part of **everyday** life at the kindergarten
- **Co-teachers:** one English and one Hungarian native speaker **sharing** the entire day
- A unique methodology with **frequent alternation** of language
- A cultural microcosm from across **the English-speaking world**
- A smooth path into the Bilingual primary school program
- The Bilingual Program **from kindergarten to high school** graduation
